

SITE PLAN

Our first release will consist of 76 homes of 2, 3 and 4 bedroom apartments and penthouses. Each building will accommodate between ten and fourteen apartments, with just two units per floor and every five to seven units will have its own access with a private lift and stairwell, which will create a feeling of exclusivity and privacy.

Because Higuera West is a new build, our engineers can collaborate with experienced security experts, insurance companies and the police to incorporate the latest high-performance equipment in our installations. Understated yet effective tools will also be incorporated to ensure a safe and secure environment for all residents.

We have upgraded soundproofing standards, both between neighbouring apartments and individual rooms to ensure the tranquility you would expect in a development of this calibre. Excellent quality brand-name appliances, fixtures and materials will be used throughout our apartments.

We have significantly decreased the overall density of the development by reducing the total number of units from 84 to 76, this will allow for more extensive landscaped garden areas and spacious units.
